

There is urgent need

of a clean, healthy condition of the teeth. Did you ever realize that your mouth was the gateway of your body and that the teeth are the guards in the gateway? Do you know that one's health is never better than his teeth? It is a fact.

LISTEN!

When the numerous bacteria of the mouth begin to multiply, due to unclean conditions rendering the mucous membrane susceptible to specific fever germs, you swallow these germs every minute and infect your digestive organs. No wonder stomach troubles result. If you are seeking good health the first thing to do is to keep your mouth in hygienic condition—disinfect with the well-known mouth antiseptic:

SOZODONT

used for this purpose for over 63 years.
SOZODONT TOOTH POWDER

OR SOZODONT TOOTH PASTE

Free from the harmful ingredients found in many dentifrices, gives the teeth a beautiful lustre. Toilet counters the World over

CAPITAL WAITED FOR SENSATION

But Senator Rayner's Speech
On Japan and Mexico Was
Disappointing.

(Special Bulletin Correspondence.)

WASHINGTON, D. C., Apr. 27.—Senator Rayner's speech, bringing up the question of sending 20,000 American troops to the Mexican border, did not meet expectations in the matter of sensational developments. It had been widely advertised that Mr. Rayner had become conversant with papers in the State Department proving that positive information existed that Japan and Mexico had made a secret treaty obnoxious to the United States. It was said that because of this information the President had mobilized one-fourth of the army as a warning to both nations that the treaty must be abrogated.

The President denied this report. It has been daily repeated. The impression prevailed that Senator Rayner would demonstrate the actual facts. On the contrary, he devoted more than half of his speech to discussing the Monroe doctrine. Taking up the question of Japan he said:

"It is my own positive conviction that there is no danger, presently or remotely, of any war between Japan and the United States. The United States certainly has no idea of even preparing the way for hostilities against Japan because there is no cause for such a procedure, and Japan has no grievance against or controversy with the United States that can not be amicably settled upon the field of peace. It is true that Japan might take certain steps, with Mexico that would arouse our suspicion and perhaps furnish cause for investigation. I am not an idealist or visionary in matters of this sort. But why these countries should go to war is it impossible for any one to understand outside of military circles and inflammatory journalists. What is the cause belli? The immigration question or the school question in San Francisco? It is too absurd to contemplate that such a proposition that can be settled by treaty and the good sense of the American people should ever become the occasion for war. It is, however, holdly proclaimed that Japan wants to control the Pacific Ocean from Capricorn to Cancer, and in time of war hold it against the world. How absolutely ludicrous is this proposition! I know the spirit of the Japanese people pretty well, and when I speak of the people of either country I am not speaking of the mob, but of the intelligence and patriotism of their respective elements.

As to Secrecy.
"The people of Japan constitute a marvelous and courageous race. They have lately concluded a war in which they were animated with a spirit of lofty heroism and daring valor and ambitious sacrifice hardly paralleled upon all the pages of history, and they emerged from this war victorious in every battle upon the land and on the sea. I am willing to admit that if Japan is entering into negotiations for coaling stations and bases for naval supplies for military purposes with Mexico that we are entitled to know what these negotiations are. Congress is, however, without any information or evidence upon the subject. This country would not ordinarily be entitled to know the secret treaties or alliances that other countries may make, but upon the part of Mexico we would unquestionably be entitled to an explanation.

Guam Taken Up.
"It is also stated that the situation at Guam is threatening and gives evidence of an intention on the part of Japan to prepare for hostilities. Guam is one of our principal volcanic possessions in the Pacific bequeathed to us by the Spanish War. It is one of the Ladrone Islands, or 'Islands of thieves,' thus named because when they were discovered the art of stealing from each other was the principal industry and delightful occupation of their inhabitants. Guam is about 5000 miles west of San Francisco and about 1342 miles from Yokohama. It was brought into captivity as a maritime prize by the American cruiser Charleston, which, with a single shot, leveled its formidable battlements and took possession of the volcanic eruption in the name of the United States. The old Spanish governor, who had been there from time immemorial, was under the impression that the Americans were saluting him and appeared upon the deck of the ship to tender his apologies for not having any powder with which to return the compliment. He never discovered the terrible state of affairs until the Spanish colors were lowered from the parapet and the colors of the Union floated in triumph over this priceless gem of the sea.

"Products."
"Guam is a charming spot, and one of the most lustrous and brilliant jewels in our Oriental galaxy. Its principal products are vipers, snakes, lizards, wild swine, rats, and castor oil, and if the island were put up at auction today, with all of the inhabitants in it, beyond its value as a military post, it would not bring a dollar and a half in any of the markets of the world. It must not be lost sight of, however, that Guam is the key to communication upon the Pacific Ocean and the relay point for cables to Manila, Tokio and San Francisco. It is necessary to relay messages to Guam, because of the resistance which the submarine current encounters in its journey from Honolulu, and if Japan ever came into possession of Guam we could be cut off from communication with the Philippines, except by way of the Azores and the Suez route, and thence to the Indian Ocean.

Philippines.
"So far as I am concerned, I would not care, if we could bring our own citizens home, whether we would be cut off to all eternity from any further communication with the Philippines. I would have permitted them to go long ago. Those of her inhabitants who are civilized, I would permit them to remain civilized; those who are uncivilized, I would permit them to remain uncivilized. Perhaps they are happier when they are uncivilized than when they are civilized. I do not believe this government is an institution for the feeble-minded nations of the earth. As it is, I suppose we must defend the Philippines as a matter of sentiment, and therefore it is of some importance to us to find out whether the government of Japan has undertaken to lay its own cable to Guam, because if it did so it simply had no right to take this step without our consent."

communication with the Philippines, I would have permitted them to go long ago. 100,000 CLUB WILL GO AHEAD

Secretary Stanton Issues Financial Statement to Existing Members.

Charles A. Stanton, secretary and moving spirit in the Hundred Thousand Club, said today that the club is due for a lot of activity now that the legislature is over and things are settling back into their normal shape. "The club will begin a period of greater usefulness than ever before," he said. "We are planning on filling out our membership lists and taking up the matter of the trip prices that was announced some time ago."

Secretary Stanton today issued the following circular letter to give the members an idea of the finances of the club:

"To the Members of the Hundred Thousand Club.

"For your information I beg to report a membership of 308 members and a balance of \$195.05 cash. In the hands of Treasurer H. P. Wood.

"All members are requested to call at the office of the Kaimuki Land Company and receive their membership cards which are now ready for delivery.

"The meeting of the Executive Committee will be held the first Tuesday in May, 1911.

CHAS. A. STANTON,
Secretary."

YACHT RACES ON FOR SUNDAY

Big Season Starts—Fleet Goes to Pearl Harbor Tomorrow Afternoon.

In preparation for the opening of the most elaborate yachting season in the history of the sport locally, Honolulu yachtsmen will go down to Pearl Harbor tomorrow afternoon and spend the afternoon and evening in informal sports and entertainment.

Commodore George Crozier has issued a call for all of his gallant tars to register their names at McInerney's Shoe Store this afternoon and tomorrow morning if they wish to take part. At three o'clock a fleet of the speedy craft, manned by the sailors, will leave Honolulu for the harbor. Among those that will go are the Hawaii, winner of the trans-Pacific race, Helene, Charlotte C., Kapiolani and several others.

After reaching the harbor the yacht club and its guests will have a big chowder and this will be followed by music and dancing in the pavilion. Final preparations will be made for the opening of the races on Sunday, in which large and small craft will participate.

INDEPENDENT HAS NEW THEATER

The Independent Theater management is growing to the proportions of the older local theatrical organization. This company has acquired the Asahi Theater on Maunakea street and will open it on May 8th. Alterations and improvements necessary are being rapidly made and it is claimed that the theater will be in first class condition by the opening date. A gallery is being installed and when completed the Asahi will seat eleven hundred people.

The Independent at present is conducting a live contest to ascertain the most popular person among its patrons. The first prize is a Ford automobile.

BE YOUR OWN MILK INSPECTOR

Call at the Honolulu Dairyman's Association, Ltd., on Sheridan street between 10 and 11 o'clock any morning and see how milk is handled by electric treatment and sanitary methods, to be placed with the consumers so it will be absolutely pure and free from germ life and bacteria.

SANITATION IS KELLER'S FORTE

Appointed on Sanitary Commission, His Record Is One of Success.

Arthur R. Keller, who was named as a member of the sanitary commission by Governor Frear is a comparative newcomer in Hawaii, but his record on the mainland has been one of success in solving problems of sanitation similar to that which the commission will take up on behalf of this City and County.

Mr. Keller is a graduate of the College of Civil Engineering, Cornell University. He is also a graduate of the law department of National University. Both before attending and after graduating from Cornell, he occupied various positions in the Maintenance of Way Department of the New York Central Lines. He left railroad work to become a junior engineer in the Corps of Engineers, U. S. A. He was junior engineer under Major John Stephen Sewell, the great portion of the time being employed on the reconstruction of Washington barracks. Washington barracks was for many years one of the outlying danger spots of the national Capital. Properly drained, filled in, and beautified, it has become the finest engineer post in the United States. The Army War College and Engineer School are located here.

Upon the completion of this work, he became assistant general manager of the Alabama Marble Company. His work with this company also brought him in contact with many sanitary questions dealing with the housing of labor, temporary and permanent.

He is at present Professor of Civil Engineering at the College of Hawaii, having occupied that position since September 1909.

He is a member of the American Society of Testing Materials, Society for the Promotion of Engineering Education, and Cornell Society of Civil Engineers.
